

GAYLE HURMUSES

STUDENT PROJECT - PHOTO TRACE

Hao D.

Melissa B.

Beth D.

This assignment required the students to reproduce a photographic image through the intelligent use of the application Illustrator, using the best tools available in the application. This was the first assignment for this particular group, which I taught in the summer of 2000.

GAYLE HURMUSES

STUDENT PROJECT - STAMP

This assignment required the students to create an integrated series of postage stamps and was the final project in a 12 week course. There are many other excellent examples, Sarab's work is my personal favourite.
