

Fish Brush

Step 1. Make a horizontal ellipse using the Ellipse tool.

Step 2. Using the convert anchor points tool, convert the anchor points at either end of the ellipse. Command-2 to Lock the shape.

Step 3. Using the pen tool, add a tail, fins, and gills. Command-2 to Lock the shape.

Step 4. Draw a single scalloped line, and Option-Shift- Drag it to make one copy in the middle of the fish and one copy at the end.

Step 5. Use the Resize tool to make the scalloped lines the appropriate length.

Step 6. Double-click on the Blend tool and set the options to specified steps with 2 steps. Make a blend between the gills and scales.

Step 7. With the blend still highlighted, select: Object > Expand.

Step 8. Make an eye using the Ellipse tool, give it a stroke of white, with a fill of black. Command-Option-2 to Unlock Command-A to Select All

Step 9. Select the new brush option from the Brush palette. Name the brush by double-clicking on it to open the dialogue box. Choose the Art Brush option.

Step 10. Choose the brush from the Tool palette, and paint some fish.
